“Be patient,” says an Eastern proverb, “and the mulberry-leaf will become satin.” The Author of this Volume fears that he has severely exercised the patience of many persons by whom its announcement was favourably received. He is not bold enough to apply the latter portion of the proverb to the quality of his work; but he fearlessly asserts that his own patience has been the most severely taxed, and he trusts that the arduous nature of his task will be deemed a sufficient excuse for the delay which has taken place.

None of the English-Latin Dictionaries extant could be fitly adopted as the basis of the new one. The plan of these works is so imperfect, and their Latin is of such doubtful quality, and often so decidedly bad, that they would have served rather to embarrass than to assist the present undertaking. This volume is, in fact, quite independent of its unsatisfactory predecessors. It has been composed with the aid of good Dictionaries of the English language, — Latin-English Lexicons and Dictionaries, with reference to classical authorities, — and Dictionaries in foreign languages, including the German-Latin of Lünemann and others, and especially the French-Latin of Noël.

Two leading objects have been kept in view throughout this Dictionary; namely, to give good Latin, and to exhibit a complete English vocabulary, with the addition of meanings to such words as are often used in various acceptations. The meanings have been carefully divided, and arranged. Readers will, of course, judge for themselves concerning the value of the whole work; but a brief notice of some things which have been done, or at least attempted, may not be altogether useless.

The Latin is classical; that is to say, the words and phrases recommended in this Dictionary are such as occur in good Latin writers. Authorities have been copiously cited; but it has not been thought necessary to attach writers' names to all the common and well-known words of the language.

English words expressive of ideas peculiar to modern times have received the best renderings which the Author could either find or devise; but these, together indeed with the rest of the work, he submits to the judgment of the learned, with every apology for all imperfections, and with a very humble request for candour and indulgence. Many words, however, which at first sight appear purely modern, or, for some reason, not capable of being directly expressed in Latin, find, in fact, an exact and simple representative in some single word, or some very compendious phrase, of a classical writer.

Barbarous or low Latin has been carefully excluded from the columns of this Dictionary; but, in some instances, when a bad word looks like a good one, or when such a word has received the sanction of existing English-Latin Dictionaries, the inferior Latin has been given in a parenthesis, with the name of a writer in whose works it may be found, by way of caution. But the Author does not profess to have pursued this plan with respect to all the bad Latin which has been recommended by our earlier lexicographers; for, unfortunately, the words to which this description would apply are very numerous, and the continual task of warning the reader against the use of them would have been, perhaps, equally invidious and needless.

The English Vocabulary will be found, it is hoped, large enough. It is, in substance, a list of English words, such as occur in our standard writers, or are in lawful and general use at the present day. Some terms nearly or quite obsolete have been inserted; especially such as are met with in well-known writers, or in any English compositions likely to be proposed for translation into Latin.

The principal meanings of English words have been exhibited in such order as appeared best; but, for the sake of brevity, this system has not been extended to meanings which are either doubtful or uncommon. When a word occurs in any sense not noticed in its place, let the student consider by what other English word that meaning is expressed, and look for such word under its own head.

Many phrases and common combinations of English words have been quoted, and supplied with Latin renderings. But here some bounds were to be observed; and the Author was continually reminded that he had not undertaken to compile a Phrase-book, but to make a Dictionary. It was necessary also to keep down the bulk and price of the volume as much as might be consistent with the completeness of the work. In many cases, a phrase is given chiefly for the purpose of showing the use of some Latin word not previously mentioned.

Let it always be remembered that this book is designed as a COMPANION, and in many respects simply as an INDEX, to the corresponding LATIN-ENGLISH DICTIONARY already published. The student is referred to that Dictionary for all additional information relating to the genders and inflexions, uses, government, and construction of words,—the difference of synonyms,—turn and application of phrases,—variations of style,—and whatever may facilitate elegant Latin composition.

The Author begs leave to return sincere thanks to numerous College and Private Tutors, Heads of Schools, and the Public at large, for their exceedingly kind and favourable reception of his Latin-English Dictionary, to which he has thus had occasion to refer. His acknowledgments are due, more especially, to those learned individuals who have kindly communicated their critical suggestions and remarks. The observations which have been sent to him by private channels, as well as those which have appeared in public reviews, are equally scholar-like and kind; nor will they fail to meet with all due attention.

The work is, at last, complete. The task of composing it has been wearisome as well as long. Let scholars and students treat the whole book according to their estimation of its worth.

The Author desires most devoutly to express his gratitude to the Giver of all Good, who has supplied him with health and strength during the period of nearly ten years in which the work of Latin Lexicography has been upon his hands. In dependence on the same Divine Providence, he devotes himself henceforth to labours purely theological and pastoral, such as are more congenial to his taste, and more strictly in accordance with his duty.

AND. *conj.* I. Et; ac; atque; que. Obs. 1. Que is put after the word which it connects with another; e. g. *Father and mother*; pater materque. 2. Some suppose that the Romans did not use ac before a vowel, but wrote, e. g. atque illum, atque ego, &c., rather than ac illum, ac ego, &c. This point is indeed very doubtful, but in writing Latin it is better to make a rule of placing atque or et before a vowel, rather than ac. II. *And also*; et etiam; atque etiam; itemque; nec non; or, neque non; e. g. *And I also am able*; et ego etiam, or nec non, possum. III. *And not*; et non; ac non; atque non; or, more concisely, nec, neque; e. g. *He knows not, and is not able*; neque (nec) potest. IV. *And if*; ac si; et si may be used, but ac si is preferable, on account of the resemblance of et si to the conjunction etsi, although. V. *And indeed, and that*; et quidem. But this is more frequently expressed by et is, et ea, et id, &c., when it refers to a substantive; and by et id, or idque, when it refers to a verb or a whole sentence; e. g. *I have many books, and indeed very fine ones*; habeo multos libros, et eos (or eosque) pulchros. — *He slept, and that in his own house*; dormiebat, idque domi. If a negative be joined with it, nec is put for et; e. g. *I have many books, and indeed not poor ones*; habeo multos libros, nec eos contempndos. *And therefore*; proin; proinde; ideo; idcirco. — *And yet*; tamen; etsi. VI. *And*, in antithetical sentences, where it is nearly equivalent to but, is usually omitted in Latin; e. g. *Cæus is rich, and Titus is poor*; Cæus est dives, Titus pauper. Or it may be expressed by autem. VII. In such a phrase as, *Do me a pleasure and come*, we must not use et, &c. but ut; e. g. *da mihi hoc, ut venias*. — Thus also, *How we may do so and so, and not be seen*; quomodo possumus aliquid facere, ut non conspiciamur. VIII. *And I, and thou, and he, &c.*, after a period or a colon, are usually expressed by qui, que, quod, at the beginning of the following sentence or clause: e. g. *He died; and when he was buried*; moriebatur; qui cum sepeliretur. — *He died with a cheerful countenance; and if you had seen him expire*; moriebatur fronte hilari; quem si vidisses mori, &c. IX. In many other cases, as when it may be expressed in English by *As, while, after, &c.*, it may be omitted, and the connection may be expressed by a participle; e. g. *He laid down the book, and rose, i. e. after he had, &c.*; libro deposito, surrexit. — *He read the book, and*

laughed, i. e. as or while he was reading, &c.; legens librum ridebat; or it may be included in the supine; e. g. *I will go and see*; ibo visum. — *A little more and he had been killed*; parum abfuit quin interficeretur.
