## PREFACE

The illustrations collected in this volume contrast in many respects with those of its predecessor. The latter was devoted almost entirely to Greek art; here will be found objects ranging from Britain to India, from Spain to Central Asia. This altered aspect is due to the fact that the volume provides illustrations for volumes vii and viii of the *Cambridge Ancient History*, which are concerned with that greatly extended horizon of which men became aware through the conquests of Alexander and the westward expansion of Rome. Yet the Mediterranean holds the centre of interest; hence the products of the Hellenistic Age, sculpture, painting, architecture and the minor arts, occupy the chief place. But, in addition to the plates illustrating such subjects, there will be found illustrations of Celtic, Iberian, Thracian, Bosporan and Carthaginian products, and of numerous coins which have been mentioned in the text of the *History*. If Italy and Rome appear to have received scant notice this is because the discussion of their art is reserved for volume ix and for the plates which will illustrate it.

For the selection of the subjects illustrated and for the commentaries on them the volume is indebted to the writers of the several chapters concerned. Mr de Navarro has dealt with the Celtic products, Professor Schulten with the Iberian, Professor Kazarow with the art of the Thracians. Professor Rostovtzeff has described the plates illustrating his chapters on the Bosporan kingdom, Pergamum, Rhodes, Delos and Hellenistic commerce. The commentary on Hellenistic sculpture, painting and architecture is the work of Professor Ashmole; Mr Charlesworth has selected the illustrations of Carthaginian handiwork. For the descriptions of the coins the compiler of the volume is responsible.

The main purpose of this book will be achieved if it proves helpful to readers of volumes vii and viii. Yet it may have an interest of its own. The first volume of plates, it was suggested, might indicate many of the influences which contributed to the formation of Greek art; the second showed the growth of that art to full maturity; the third depicts the civilized world and its barbarian fringes eagerly borrowing, selecting, modifying the artistic ideas of the Greeks.

## PREFACE

Acknowledgments are gratefully made to Professor Ashmole, Dr A. B. Cook, Professor Ebert, Monsieur Goury, Professor Kazarow, Professor Rostovtzeff and Professor Schulten for the use of photographs in their possession, and to the Directors of the British Museum and of the Austrian Archaeological Institute for permission to reproduce numerous pictures. The Directors of the Museums in Berlin, Cologne, Copenhagen, Munich, Oxford, Paris and Rhodes have either generously supplied photographs or sanctioned the reproduction of antiquities under their care. To Dr G. F. Hill, Keeper of Coins and Medals in the British Museum, to Professor K. Regling and Monsieur J. Babelon of the Cabinets of Coins in Berlin and Paris, as well as to Monsieur R. Jameson and Mr E. T. Newell, thanks are due for the provision of plaster casts and photographs of coins.

Professor Ashmole desires to thank Mr E. S. G. Robinson of the British Museum for selecting the coins illustrating portraiture on p. 164; Mr de Navarro thanks Professor and Mrs Chadwick for assistance on various points. The volume is, in particular, indebted to Professor Rostovtzeff for the use of eight of his pictures of Hellenistic terracottas. Messrs F. Bruckmann of Munich have generously supplied a photograph (p. 178 [*b*]) which is due to appear in a forthcoming publication (Hermann, *Denkmäler der Malerei des Altertums*).

Reproduction from the books specified has been sanctioned by the following publishers:

- C. A. Beck, Munich (*Furtwängler, Kleine Schriften*).  
E. de Boccard, Paris (*Bulletin de Correspondance Hellénique*, 1884).

## PREFACE

The Staff of the University Press again deserve grateful acknowledgment for their accurate care.

Upon the outside cover is a design representing a bronze statuette in Berlin. It is of the third century B.C. and represents a Gallic slinger with a horned helmet and wearing a torque and a belt.

## GREEK AND CELTIC COINS

[a] Silver obol of *Phocaea* in Ionia, sixth century B.C. Found at *Saint-Remy de Provence*. Head of a seal, a little seal beneath it (cf. *Vol. of Plates*, i, 302 [b]). Wt. 0.6 g.

[b], [c], [d] A diobol and two obols from the *Hoard of Auriol* near *Marseilles*; the type a ram's head. The first like [a] may be of Ionian mintage, the second perhaps made by a Massiliote Greek, the third is a barbarous imitation struck by the pre-Celtic inhabitants of southern France. *Bibl. Nat. Paris*. Wts. 1.15 g.; 0.6 g.; 0.6 g. (vii, 46.) See de Navarro, *Antiquity* II, 1928, p. 431.

[e]-[j] The gold stater of *Philip of Macedonia* and its *Celtic derivatives*. [e] Minted by *Philip* in Macedonia (cf. *Vol. of Plates*, ii, 6 [o]). [f] An intelligent *Celtic* imitation. [g] Attributed to the *Raurici* (district around Bâle); [h] to the *Aulerici Diablintes* (Normandy). [i] A type characteristic of *Kent* (but found occasionally on the opposite French coast); the head of the god with elaborately stylized hair. [j] A broken-down version of the last, hair and lines on the obverse; the horse on the reverse reduced to lines and pellets. Occurs in *S.W. England* (Oxfordshire, Sussex, Cornwall). [e] *Seltman Coll.* Wt. 8.58 g. [f] *Brit. Mus.* Wt. 8.55 g. [g] *Dessercffly Coll.* Wt. 7.43 g. [h], [i] *Brit. Mus.* Wts. 6.67 g.; 7.68 g. [j] *Dessercffly Coll.* Wt. 6 g. (vii, 46, 47.)

[k], [l], [m] Coins of the *Eastern Celts* imitated from silver tetradrachms of *Philip of Macedonia* (cf. *Vol. of Plates*, ii, 6 [p]). [k] From *Pannonia*. Head of Zeus. Rev. horseman and indeterminate letters. [l] From *Dacia*. The head stylized into curves, spirals and alphabetic signs; the rider is bird-like. [m] From *Moesia*. A bearded Janiform head doubtless influenced by the Roman *as* (above, p. 6) and therefore to be dated in the second century B.C. Rev. horseman. All in the *Dessercffly Coll.* Wts. 13.45 g.; 11.10 g.; 13.52 g. (vii, 46.)

[n] Gold *Regenbogenschüsselchen* of the type attributed to the *Boii*. Bird's head, torque and pellets. Rev. concave, a 'rainbow' and six pellets. Formerly *Pozzi Coll.* Wt. 7.48 g. (vii, 47.)

[o] *Massilia*. Drachma, fourth century B.C. Head of Artemis. Rev. ΜΑΣΣΑ lion. *Brit. Mus.* Wt. 3.7 g.

[p] *Celtic imitation* of the last coin. *Dessercffly Coll.* Wt. 2.19 g. (vii, 46.)

[q] *Rhode*. Drachma; female head. Rev. open rose. *Brit. Mus.*

[r] *Emporium*. Drachma; female head, dolphin. Rev. Pegasus (cf. p. 10 [i] for a slightly later coin). *Brit. Mus.* Celtic imitations of these types are frequent. (vii, 46.)

## THE CELTS

CHIEFTAIN'S GRAVE, *Weisskirchen*, Rheinprovinz, Barrow 2 La Tène A (see vii. 43 sq.). (*Bonner Jahrbücher*, XLIII, 1867, Pl. VII; Déchelette, *Manuel* (1914), II, 3, fig. 439; Jacobsthal and Langsdorff, *Die Bronzeschnabelkanne* (= J. and L.), 1929, p. 28, Pl. 36 a and b.)

[a] Bronze stamnos or vessel for mixing wine (height 40 cm.). Note beaded lip with two catches for lost lid. This vessel was found to contain white pitch. Pliny tells us that the Greeks mixed pitch, resin and other substances with their wines to give them briskness (*H.N.* XIV, 124). See de Navarro, *Antiquity*, 1928, p. 435.

[b] Handle with Silenus mask from same. Cf. Déchelette, *La Collection Millon* (1913), fig. 18, 3.

[c], [d] Bronze beaked flagon (*Schnabelkanne*). Height 42.5 cm. Jacobsthal (*op. cit.*) makes out a strong case for these flagons being of Etruscan, not Greek origin. They date for the most part from the opening decades of the fifth century B.C.

[e] Handle to same. Jacobsthal type 5 (see J. and L. pp. 45 f.). Associations of stamnoi with beaked flagons occur also on the following sites north of the Alps: Dürkheim, Rhenish Palatinate; Klein Aspergle, Württemberg; Weisskirchen, Barrow 2; Bouzonville, Lorraine (see p. 34). Another stamnos was found in the tumulus of La Motte St Valentin, Hte. Marne.

[f] Gold band, possibly an armlet. Diameter 4.7 cm. Zone of winged sphinxes in repoussé, above and below which a zone of lattice patterns between two beaded lines. Reinecke (*Mainzer Festschrift*, 1902, p. 74) considers that both in form and workmanship the sphinxes are faithful and competent copies of Greek models but that the barbaric origin of the object is betrayed by the mechanical repetition of the sphinxes and the ornamentation of the two zones framing them (vii. 48).

[g] Lower part of an iron dagger with remains of bronze sheath ending in a trefoil chape; note the gold foil rosettes. Length 7 cm.

CONTENTS OF A RHENISH CHIEFTAIN'S GRAVE

## THE CELTS

CHARIOT-BURIAL, *Somme Bionne, Marne*. La Tène A (see vii, 43). (*Brit. Mus. Guide, Iron Age Antiquities*<sup>2</sup>, Pl. III; Morel, *Champagne Souterraine*, Pl. VII *sqq.* and text, pp. 23 *sqq.*; also Ebert, *Reallex. der Vorgeschichte* (= *R.L.V.*), s.v. Wagengrab.)

The grave in question is a flat grave, surrounded by a circular ditch. The following are among the more important objects found (unless otherwise stated they are of bronze): a long iron Early La Tène sword in a bronze and iron scabbard ending in an enamelled trefoil chape (*B.M. Guide*, fig. 54); iron spits (Déchelette, *Collection Millon* (1913), p. 231); an embossed gold band; a gold finger-ring; a girdle clasp, confronted griffons type (*B.M. Guide*, Pl. IV right); a beaked flagon (*ib.* fig. 53, cf. above, Pl. II c). Apart from two iron tires and other parts of the chariot, the following horse-trappings: forked objects with trefoil terminals, pierced circular and semi-circular objects (*B.M. Guide*, Pl. IV); two iron bits with bronze rings. Pottery: a local pedestal urn (*B.M. Guide*, cf. fig. 64); a red-figure Attic kylix (J. and L. Pl. 34 a). In Jacobsthal's opinion this vase cannot date from before 450 B.C. (*ibid.* p. 62). In view of this, the Somme Bionne chieftain was probably laid in earth between 440 and 420 B.C., possibly a generation later than the chieftain in the second Weisskirehen barrow.

Apart from relatively numerous burials in France, chariots have been found in the La Tène A Rhenish Chieftains' Graves (see also *Mannus*, xxii (1930), pp. 103 f.). For S.W. Bohemia (La Tène A), see Schranil, *Vorgesch. Böhmens-Mährens*, p. 212. Those from Yorkshire and most of those from Hungary (*B.M. Guide*, pp. 119 *sqq.* and *R.L.V.* xiv, p. 29) date from phase C. The Yorkshire chariot-interments differ from those of the continent in that the skeletons were contracted (buried seated in the chariot?) and that horses were found: in continental chariot-burials horses are exceptional. Hallstatt chariot-graves occur from S.W. Bohemia to the Marne (Jogasses grave 16) and even further west. Unlike those of the La Tène period, many of these earlier vehicles have four wheels.

There is an allusion to chariot-burial in the 'Destruction of Dind Rig,' an Irish prose epic referring to a period prior to that of the Ulster cycle (*Zeitschrift für Celtische Philologie*, III, p. 9).

EXAMPLES OF LA TÈNE A ORNAMENTATION FROM THE MIDDLE RHINE AND MARNE AREAS (see vii, 47 sq.).

[a] Gold pierced mounting, possibly for a cup, from a Chieftain's Grave at Schwarzenbach (Barrow 1), Birkenfeld (= *Bonner Jahrbücher*, xxiii, Pl. IV, 3; cf. Baldes-Behrens, *Katalog Birkenfeld*, Pl. 5). The top frieze, framed by zones of beading, is mainly composed of 'Celtic' (three-leaved) and disintegrated palmettes. The middle, of stylized palmettes, the multifoliate articulation of their two lower side leaves contributing to the formation of the palmette derivatives with which they alternate. The lowest and narrowest frieze is composed of bud motifs, the neck of each bud being separated by a moulding from the crest of the undulated line on which it stands (cf. Déchelette, *Manuel*, fig. 664); two zones of beading.

[b] Engraved ornamentation on the bronze helmet from Berru, Marne (= *Rev. Archéologique*, 1875, I, Pl. X; cf. Déchelette, *op. cit.* figs. 656 and 490.2). (See vii, 48.) Top left hand corner: interlocking *s*-motifs with foliate 'insets.' Top right hand corner and middle: derivatives from the enclosed palmette alternately inverted and connected by curved almond-shaped motifs; on the projecting parts, palmette derivatives and palmettes. Lowest: degenerate derivatives of the enclosed palmette; similar connecting motifs. The engravings on this helmet (with which cf. Déchelette, *op. cit.* fig. 655) reveal a tendency towards a treatment of design fundamentally at variance with classical tradition: the abolition of the distinction between the pattern and its background, brought about by the covering of a given ornamental field with primary and complementary motifs. Not only did this practice open a whole range of fantastic curvilinear patterns, but it contributed very largely to the abstract, geometric treatment of ultimately naturalistic motifs. The origin of this innovation is perhaps to be sought in pierced metalwork (cf. [a]), or possibly in such inlay work as that on the throats of the Bouzonville flagons (cf. p. 35). On the helmet from Berru the contrast is heightened by the complementary motifs being carried out in *pointillé*. For an example of developed primary and complementary ornamentation, see the bronze mirror from Desborough (*B.M. Iron Age Guide*, fig. 133).

## THE CELTS

BRONZE BEAKED FLAGON of Celtic workmanship from *Bouzonville*, near Metz. La Tène A. In the *British Museum*. (R. A. Smith, *Celtic Bronzes from Lorraine*, in *Archaeologia*, LXXIX, pp. 1 *sqq.*; *Illustrated London News*, March 23rd and 30th, 1929; *The British Museum Quarterly*, IV, No. 3, p. 66; J. and L. p. 99.) One of a pair of bronze flagons (*oinchoai*) ornamented with coral and red enamel, found with two bronze stanmoi (cf. above, p. 23 [a]). Greatest height: about 39.4 cm. Patina, a dark lustrous green. For a full description of this remarkable flagon see Smith, *op. cit.* pp. 3 *sqq.* (cf. *ib.* fig. 4). The flagons from Bouzonville differ in many features from the usual type of *oinchoe* (cf. above, p. 23 [c], [d]): the bodies of the former are tall and high-shouldered and only paralleled by the clay *Schnabelkanne* from Hallstatt (J. and L. p. 99, Pl. 27, No. 138); the beaks and the tops of the Bouzonville vessels are covered in (the wine was poured in through a narrow hole, closed with an enamelled bronze stopper, and out through a narrow tube, the point of egress lying below the duck on the spout). They also differ in being embellished with coral and red enamel, and in certain of their zoomorphic features: the duck on the covered spout, the ear- and thigh-spirals on the beasts. The latter features have been attributed to Seythian influence (but see J. and L. p. 59 for thigh-spirals). Should this view prove correct, the occurrence of such spirals on the Bouzonville flagons—which also bear very early Celtic enamel work—would lend colour to the view that the art of enamelling reached the Celtic area from the Black Sea region. Owing to the dearth of connecting links, it is not easy to determine the routes by which Seythian influence reached the Celtic area during La Tène A: although there is undeniable evidence for the presence of Seythian raiders in Silesia during the fifth century (see *Schlesiens Vorzeit*, N.F. IX, pp. 11 *sqq.*), the Celtic invasion of that region did not occur until phase B of the La Tène period. Ear-spirals are foreign to Greek and Etruscan art: but, in comparing resemblances between the Seythian and Celtic styles, one should not forget that they were both to a great extent parallel but independent barbaric developments of a common classical influence (vii, 48). Although this important new find may reveal the existence of Seythian influence upon Celtic Art as early as La Tène A, there is no reason to believe that influence to have been of other than secondary importance.

## THE CELTS

OBJECTS from the DOUBLE BURIAL near *Waldalgesheim, Hunsrück*. La Tène B (vii, 45) (= *R.L.V.* xiv, Pl. 55-6; E. aus'm Weerth, *Der Grabfund von W., Bonner Winkelmannsprogramm*, 1870; *Führer durch das Provinzialmuseum, Bonn* (1915), p. 25, Pl. 9 (1, 2), Pl. 10; Behrens, *Katalog Bingen* (1918), pp. 25 *sqq.*). The lower of the two graves contained the remains of a man with his horse, chariot, table service [a], [b], etc.; the upper one that of his wife or concubine with rich objects of adornment (see [c]-[f]). (Cf. vii. 73.)

[a] The bronze flagon is a Celtic derivation from the earlier Etruscan *Schnabelkanne*. Instead of a beak it is furnished with a tubular spout, and differs still further from the usual beaked flagon in the shape of its body and its foot (cf. 23 [c]). The small horse surmounting the vessel in the photograph is thought to belong to the lid. Note the bearded figure with human ears and long pointed ears (horns?) at the foot of the handle, probably derived from the Achelous mask. For the ornamentation on the body of the vessel, not visible on this plate, see *B.M. Iron Age Guide*, fig. 11, p. 20 (cf. *Mainzer Festschr.* 1902, p. 82; J. and L. p. 44). Further examples of this type of flagon occur in France (2) and the Rhenish Palatinate (1), while a number of imitations in pottery came to light in the South Swiss (Ticino) cemeteries (cf. Behrens, *op. cit.* p. 28 *sq.*; Déchelette, *op. cit.* II, 3, fig. 654, p. 1454 *sq.*).

[b] The bronze bucket is one of the only Greek works of art found in the transalpine Celtic area in a La Tène B context (cf. vii, 45). Outside of that area, apart from the example cited on vii, 45, one of these buckets was found at Kjeldby (Denmark). Cf. Déchelette, *op. cit.* pp. 1440-2. The free flower-tendrils (*frei bewegte Blütenranken*) at the base of the drooping palmette on the Waldalgesheim bucket show that this vessel cannot be dated earlier than the closing years of the fifth century B.C. (cf. *Mainzer Festschr.* 1902, p. 81).

[c] Gold tore with buffer terminals. The ornamentation (forked flower-tendrils) is directly derived from the decoration on the bucket [b]. For full analysis of the ornamentation, see *B.M. Iron Age Guide*, pp. 19 *sqq.*

[d], [e] Two gold buffer-ended wristlets decorated with human masks, palmette decorations, free tendril motifs, etc.

[f] Closed, twisted gold ring for the upper arm.

The chief new classical contribution towards La Tène B art is the free tendril motif.

Types of BRONZE AGE CHIP-CARVED POTTERY, *Kerbschnittkeramik* (= *RLV*, VIII, pl. 78). (vii, 55.) [a]–[b] From *Bavaria*. [c]–[g] From *Württemberg*. [h]–[i] From *Hesse*. Respective heights: 12.5 cm.; 8 cm.; 6 cm.; 5 cm.; 10.5 cm.; 12 cm.; 5.7 cm.; 8.5 cm.; 13.8 cm. Apart from the Lower Rhenish area chip-carved pottery practically disappears in Hallstatt A to re-emerge in Hallstatt C (see vii, 55 on recrudescence of the Bronze Age population in South Germany). Also cf. forms of funnel-neck globular-bodied vessels of Hallstatt B (*AuhV*, v, Nos. 1002, 1007) with fig. [f] and Behrens, *Bronzezeit Süddeutschlands*, Pl. XV). See Behrens, *op. cit.* for sites. HARPSTEDT POTTERY (= *Mannus*, xvii (1926), p. 293). (See vii, 67, 56.)

The cradle of the Harpstedt style lay in the region between the Ems and the Weser, whence it spread [i] through the Lippe valley to the Lower Rhenish area. [ii] through Brunswick to East Havelland and parts of Saxony. The vessels, which vary in colour (light yellow, reddish, dark brown), are more or less pail-shaped with frilled lips and rough walls; the roughened appearance is obtained by smearing, or combing. According to Stampfuss' revised chronology (cf. *Mannus*, *Ergänzungsband v* (1927), pp. 50 *sqq.* with *Mannus*, xvii, 1926, pp. 287 *sqq.*), the vessels date from Northern Bronze Age V to Hallstatt C. Rhenish variants [t]–[u], often with finger-tip ornamentation, occur in the Middle Rhenish zone (cf. Rittershausen, *Nass. Annalen*, 1926, Pl. IX, 12, 13, and the Coblenz region, *Mannus*, xxii, 1930, p. 109 *sq.*), where they overlap with the Mehren (Hallstatt C/D) and La Tène A cultures. The people who brought these vessels with them to the Lower Rhine area are held to be the first Teutonic invaders to settle in those parts.

Type I, [j]–[k], does not survive the Bronze Age; type II, [l]–[m], is more frequently found in the Bronze Age; types III, IV, V, [n]–[o], [p]–[q], [r]–[s], date from Hallstatt C, although a few examples of type III occur in Bronze Age V. Certain vessels of true Hallstatt C/D forms found in the Lower Rhenish area reveal in the roughening of their walls Harpstedt influence. (See Stampfuss, the two papers referred to above, and literature there cited; Kendrick, *The Druids*, p. 39 *sq.*, for occurrence in England; cf. Childe, *The Danube*, p. 364 *sq.*)

TYPES OF POTTERY

## THE CELTS

### POTTERY FROM THE LOWER RHINE AND THE MARNE.

[a], [b] *Pail-shaped urns* (Eimerurnen) with 'finger-nail' ornamentation. [a] from *Hirzenberg* near *Siegburg*, Rhine Province; *Hallstatt D* (= *R.L.V.* VIII, Pl. 161 c). [b] from *Marson*, Marne; *La Tène I* (= *B.M. Iron Age Guide*, Pl. v 8). Height: 16 cm.

[c], [d] *Broad paunched urns with tall incurving necks*. [c] with triangular motifs on paunch, from *Hirzenberg* near *Siegburg*; *Hallstatt D* (= *R.L.V.* VIII, Pl. 161 f). Also found in *Mehren* (*Hallstatt C/D*) contexts (vii, 69). [d] slightly carinated variant of same, with decoration in white, from *Haulzy*, Marne, grave 78; beginning of the *La Tène* period (= *Goury, L'Enceinte d'Haulzy*... Pl. IV). Height: 22.5 cm. Further examples of this type occur at *Étrechey*, Marne (*Morel, op. cit.* Pl. 19, 9 and 12). Cf. also *Baldes-Behrens, Katalog Birkenfeld*, Pl. XII 9, and the more angular *La Tène I* variants from the *Trèves* region (*Déchelette, op. cit.* fig. 669). [a], [c] *Cologne Museum*, [b] *Brit. Mus.*, [d] *Nancy Museum*.

The distribution of these types of pottery supports E. Rademacher's view of a migration of part of the Lower Rhenish 'Tumulus peoples' into the Marne and Middle Rhine areas at the end of *Hallstatt D* (*R.L.V.* v, s.v. *Haulzy*, and VIII, p. 497); (see also vii, 67 sq.). *Haulzy* was cited (vii, 60) as an isolated link between the Lower Rhenish Tumulus peoples and the Late *Hallstatt* Celtic invaders of Spain. Since the publication of vol. VII, other sites of the *Haulzy* type have been excavated by *Chenet* in the east Marne district. Apart from these, *Hallstatt* influences reached the Marne (*Rev. Arch.* 1927, *Jogasses*) presumably from the Swiss plateaux. What is probably an earlier type of the *Siegburg-Haulzy* urn was found at *Can Missert* (*Terassa*), *Catalonia* (*Anuari de l'Institut d'Estudis Catalans*, VI, p. 584, fig. 335; still closer parallels are to be seen in the *Barcelona* museum). *Kraft* and *Bosch Gimpera* (*Mannus*, Ergbd. VI (1928), pp. 258 sqq.) and *Kraft* (*Stellung der Schweiz*... in *Anzeiger f. Schweiz. Altertumskunde*, 1927/8, and *Antiquity*, 1929, pp. 33 sqq.) show that there is reason to believe that the Celts invaded coastal *Catalonia* as early as the *Urnfield* Period (vii, 55). These papers, which only came into the writer's hands after vol. VII, chap. II, was in the Press, are important. Nevertheless, the location of the early home of the Celts in the *Rhone* area is not borne out by the testimony of river-names [vii, 54]. Further, 1100 B.C. seems too early a date for this invasion: in spite of the occurrence of cylinder-neck urns, other types of pottery from *Can Missert* and similar sites point to the event in question not taking place prior to *Hallstatt B*, cire. 900-800 B.C., and possibly being connected with *Hallstatt* pressure on the Swiss lake-dwelling population. The finds from *Peralada* show that *Catalonia* was also affected by the Late *Hallstatt* Celtic invasions (*Anuari*, VI, p. 590 sq.; cf. vii, 59 sq.).

## THRACE

[a] Relief of the fourth century B.C. Bendis, wearing a long-sleeved shortened chiton, covered by an animal's skin (*nebris*) slung over the left shoulder. A long cloak (*zeira*) falls behind, on her head a Thracian cap and on her feet high boots with tops turned over. Her right hand holds a patera, her left a spear. Facing her are two bearded men in chitons, the leader carrying a torch in his lowered right hand. They are followed by eight naked epheboi. In the *British Museum*. (viii, 549.)

[b] Relief from *Shapla-dere* (Mesembria on the coast of the Aegean). A four-wheeled cart drawn by a pair of mules or horses. The driver, wearing a sleeved chiton and cloak, sits on the box. In the cart behind is a passenger wearing a cloak clasped in front. An outrider, wearing short chiton and cloak, precedes the cart. About 450 B.C. Height 1.02 m. *Sofia National Museum*. (viii, 555.)

[c] A funeral stele from *Abdera*. A horseman wearing chiton, chlamys and baggy trousers riding to right; on his right hip, hung from a belt, is a sword, and his right hand once brandished a spear. His left arm raises an oval shield. Behind him (much mutilated) stands the figure of a soldier carrying two spears. Second to first century B.C. Height 1.23 m. *Sofia National Museum*. (viii, 543.)

## THRACE

A set of three SILVER-GILT PHALERAE in high relief; each has a triple frame consisting of a coarse leaf border, a striped border and a raised cable border.

[a] A horseman wearing trousers, top-boots and a stiff cloak, round his neck a collar of five spirals. He raises his right hand in a gesture of adoration (cf. *Vol. of Plates*, i, 264). Diam. 15.5 cm.

[b] Female bust facing. Two plaits of her thick hair hang down in front of her shoulders; round her neck is a collar of eight spirals and she wears armlets, each of five spirals, with triangular ornaments above and below each armlet; she is clad in a sleeveless woollen tunic with embroidered border, a plait (perhaps a gold ornament?) hangs between the breasts. Over each shoulder appears a bird (dove?). Diam. 18.3 cm.

[c] Elaborate rosette with central sunflower ornament. Diam. 12.5 cm. [cf. Rostovtzeff, *Recueil Kondakoff*, Pls. XXIII, XXIV; and p. 110 below].

All from *Galiče* (district of *Orechovo* in northern Bulgaria). *Sofia Nat. Mus.* (viii, 560.) Second to first century B.C.

## BOSPORUS

ENGRAVED and GILT SILVER MIRROR, probably imported from Aeolian Asia Minor. Greek workmanship. Found in a Seythian barrow-grave near *Kelermes* in the Kuban region. Adorned with various figures of gods and animals, the most prominent being the winged figure of the Great Goddess, mistress of animals, the *πότνια θηρών*, and opposite it a group of two Silens (forest-spirits) fighting a griffin. Sixth century B.C. In the *Hermitage*. (viii, 571.)

[Rostovtzeff, *Iranians and Greeks*, Pl. VI; Ebert, *Reallexikon der Vorgeschichte*, vi, p. 279, Pl. 81 a]

## BOSPORUS

[a] GOLD CUP of Assyro-Phoenician or early Persian workmanship. Found in a Seythian barrow-grave near *Kelermes* in the Kuban region. Decorated with three rows of animals in repoussé work: a row of running ostriches, another of dogs chasing gazelles or antelopes, and a third with figures of male and female ibexes. The style of the last row recalls the Seythian animal-style. Sixth century B.C. *Hermitage*. (viii, 571.)

[Rostovtzeff, *Iranians and Greeks*, Pl. VII, 1; Ebert, *Reall. d. Vorg.* VI, Pl. 81 b]

[b] GOLD FISH, probably a horse-trapping or armour plate, of Ionian workmanship. Found in Germany in Brandenburg near *Vettersfelde* and forming part of a treasure which belonged originally to a Seythian chieftain or part of the furniture of a Seythian grave. The body of the fish is decorated with two rows of figures: lions attacking hoofed animals and fishes, headed by a Triton; the tail bears a figure of an eagle; all in repoussé work. The extremities of the tail end in ram-heads. Early fifth century B.C. *Antiquarium, Berlin*. (viii, 571, 587.)

## BOSPORUS

[a], [b] HANDLE and SHEATH of a SHORT SCYTHIAN SWORD (*akinakes*). Plated with gold, made by an Ionian artist for a Seythian customer or by a Seythian artisan trained by an Ionian. Found in a Seythian barrow-grave near the farm *Shumeiko, Romny, Poltava*. The handle is adorned with geometric ornaments in granulate work, like Ionian works of the same kind, and the sheath with figures of animals treated both in the Near Eastern and in the Seythian manner. The two heraldic ibexes above are orientalizing; the vertical row of seven cat-like creatures is Seythian in style. Sixth century B.C. In the *Museum, Kiev*. (viii, 571, 587.)

[Rostovtzeff, *Iranians and Greeks*, Pl. VIII, 3; W. Ginters, *Das Schwert der Skythen und der Sarmaten*, Pl. 3 c and 69 b (reconstruction of this and contemporary and related Seythian swords), cf. Ebert, *Reall. d. Vorg.* xiv, pp. 156 *sqq.*, Pl. 15]

[c] SHORT SCYTHIAN BRONZE SWORD (*akinakes*), probably of local Seythian workmanship. Found in a Seythian barrow near *Poltava*. The handle is adorned with east figures of animals treated in the manner of the Seythian animal style (two feline and two hoofed animals, probably female elks or reindeer). Sixth century B.C. *Museum, Poltava*. Unpublished. (viii, 571, 587.)

[d] GOLD-PLATED SHEATH of a SCYTHIAN SWORD, probably of Panticapaeon workmanship. Adorned with a running design in the Ionian animal style. The work is repoussé (lions and heads of a stag or reindeer), with the exception of the chape which bears the figure of a stylized mask or Medusa-head. Found in the side-grave of the barrow of *Solokha* (left side of the lower Dnieper). Fourth century B.C. *Hermitage*. (viii, 571, 587.)

[W. Ginters, *Das Schwert der Skythen und der Sarmaten*, Pl. 22 b; Ebert, *Reall. d. Vorg.* xii, pp. 294 *sqq.*, Pl. 81 b]

SWORDS AND A SHEATH

## BOSPORUS

[a] Gold figure of a WILD BEAST (lioness?). Probably a decoration for armour. Scythian or Central Asiatic workmanship. Note in it traits which link this peculiar treatment of metal by the artist (the so-called *Schrägschnitt* or a peculiar kind of chip-carving) with the typical treatment of wood or bone; ep. 112 [b], [c]. Found in a barrow-grave near *Kelermes* in the Kuban region (ep. 78 and 80 [a]). The ears of the beast are inlaid with amber, the eye and the nostrils with enamel in proto-*cloisonné* technique. The paws of the animal, rendered in *repoussé* work, are shaped as cats curled up. The tail consists of six such medallions likewise in *repoussé* work. This treatment of extremities is one of the peculiarities of the Central Asiatic beast-style. Sixth century B.C. *Hermitage*. (viii, 571, 587.)

[Rostovtzeff, *Iranians and Greeks*, Pl. IX, 1; *idem*, *The Animal Style in S. Russia and China*, Pl. V, 2; Ebert, *Reall. d. Vorg.* XIII, Pl. 27 A (c); Borovka, *Scythian Art*, Pl. 12]

[b] Figure of an ANIMAL of FELINE species. Cast bronze, plated with gold. Scythian workmanship. Found in the grave of the *Zolotoj Kurgan* (Golden Barrow) near *Simferopol* in the Crimea. The gold sheath which covers the centre of the body of the beast is adorned with almond-shaped wire frames originally filled with enamel. Sixth century B.C. *Hermitage*. (viii, 571, 587.)

[Ebert, *Reall. d. Vorg.* XIII, Pl. 31 A (c); Borovka, *Scythian Art*, Pl. 13]

[c] Figure of an ANIMAL of FELINE species. Cast bronze, plated with gold. Scythian workmanship. Place of origin unknown. The shoulder of the beast is adorned with a stylized eagle, or eagle-griffin, head, which is a peculiarity of the Central Asiatic animal style (ep. 112 [b]). Sixth to fifth century B.C. *Louvre*, Department of Far Eastern Art. Unpublished.

## BOSPORUS

[a] BRONZE POLE-TOP. Cast bronze. Seythian workmanship. Found in a Seythian barrow-grave near the *Ulski Aul* in the Kuban region. The pole-top shows the shape of an eagle-head reduced to a stylized beak (spiral) and an equally stylized eye (formed as a human eye). The eagle-head is adorned with other stylized eagle-heads reduced to beaks and eyes of varying sizes. Below, a figure of a crouched ibex. The pole-top is a typical product of the Central Asiatic animal-style. Sixth century B.C. *Hermitage*. (viii, 571, 587.)

[Rostovtzeff, *Iranians and Greeks*, Pl. X A; *idem*, *Animal Style*, Pl. VI, 1, 2; Borovka, *Scythian Art*, Pls. 24 and 25; Ebert, *Reall. d. Vorg.* Pl. VI, 1, 2. Cf. Rostowzew, *Skythien und der Bosphorus*, p. 264]

[b] BRONZE POLE-TOP. Cast bronze. Seythian workmanship. Place of origin unknown. Shape of a mule-head. Sixth to fifth century B.C. *Louvre, Paris*. Cp. Rostovtzeff, *Iranians and Greeks*, Pl. ## BOSPORUS

[a] SILVER RHYTON. Persian or Graeco-Persian workmanship. Found in one of the graves of the *Seven Brothers Barrows* in the Kuban region. The end of the rhyton is shaped as the forepart of a winged ibex (an animal typical of Persian art). Fifth century B.C. *Hermitage*. (viii, 571, 587.)

[Minns, *Scythians and Greeks*, p. 211, fig. 110; Rostovtzeff, *Iranians and Greeks*, Pl. XII A; Ebert, *Reall. d. Vorg.* XII, pp. 84 *sqq.*, Pl. 18 A]

[b] GOLD ARMLET. Greek or Graeco-Persian workmanship. Found in one of the graves of the *Seven Brothers Barrows*. The body of the armlet consists of two fine flexible chains; the ends terminate in snakes' heads. Fifth to fourth century B.C. *Hermitage*. (viii, 571, 587.)

[Rostovtzeff, *Iranians and Greeks*, Pl. XV, 1]

[c], [d] GOLD PLAQUES of roughly triangular form. Originally probably nailed to the rim of a wooden or horn rhyton. Persian, or Graeco-Persian, workmanship. Found in one of the graves of the *Seven Brothers Barrows*. One of the plaques is adorned with a figure of a winged panther or tiger killing an ibex, the other with that of an eagle killing a kid. Fifth century B.C. *Hermitage*. (viii, 571, 587.)

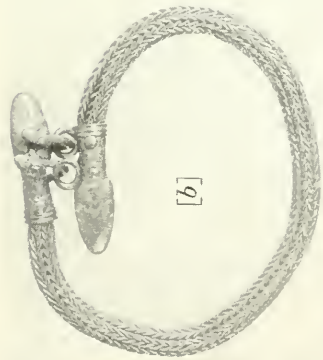

[Minns, *Scythians and Greeks*, p. 211, fig. 112; Rostovtzeff, *Iranians and Greeks*, Pl. XIII; Ebert, *Reall. d. Vorg.* XII, p. 87, Pl. 19]

[e] GOLD PLAQUE, probably nailed originally to the rim of a wooden or horn rhyton, produced in one of the Greek cities of the Black Sea. Found probably in a Scythian barrow near *Maïkop* in the Kuban region. Sea-eagle carrying a sturgeon. Cp. the coins of Sinope and Olbia. Fifth century B.C. *Antiquarium, Berlin*. Unpublished. (viii, 587.)

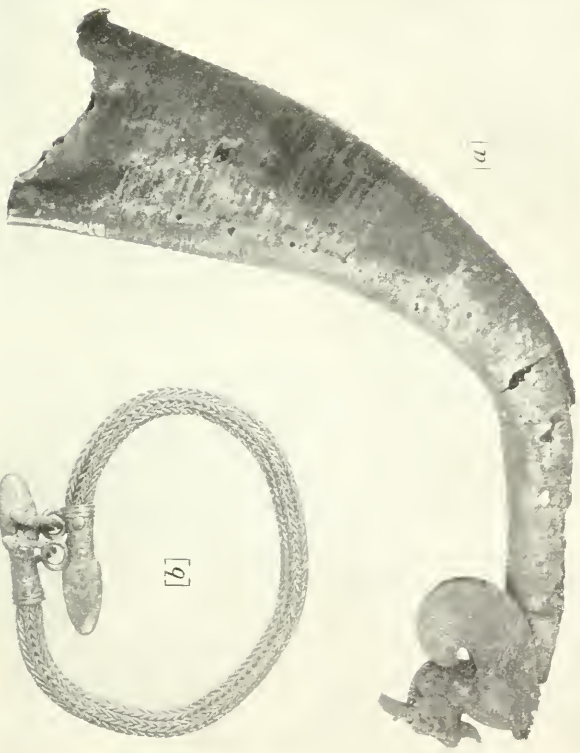

[Cf. Rostowzew, *Skythien und der Bosphorus*, p. 346]

[f] ENGRAVED GEM, enlarged. Persian or Graeco-Persian workmanship. Found in a barrow of the necropolis of *Nymphaeum* (El-Tegen) near Panticapaeum. Horned Persian lion-griffin. Fifth century B.C. *Ashmolean Museum, Oxford*. (viii, 571, 587.)

## BOSPORUS

ARYBALLUS OF XENOPHANTUS. Work of an Athenian artist, perhaps resident at Panticapæum. Found in a Greek grave at *Panticapæum*. The body of the vase is adorned with figures in relief and painting. The figures in relief are coloured white, red and blue, with gilt accessories: the end-figures are flat in red-figure technique. The scene represents Persians on a hunting expedition, their names being inscribed beside the figures. The animals hunted are partly real, partly fantastic. The vase bears the inscription: **ΞΕΝΟΦΑΝΤΟΣ ΕΠΟΙΗΣΕΝ ΑΘΗΝ**. Shortly before 400 B.C. *Hermitage*. (viii, 585.)
